# Universal Wheel Spinners Kit
## Used on All Gas or Electric Carts

**NOTE -** This kit is designed for use with ITP brand wheels. This kit can be used on other wheels provided the center cap opening in your wheel is approximately 2 5/8” diameter.

## Parts List

| Item ID | Qty | Description |
|---|---|---|
| A | 4 | Replacement Chrome Center Cap |
| B | 4 | Special Shoulder Bolt |
| C | 4 | Spinner Disc |
| D | 4 | Nylon Washer |

## Wheel Spinner Installation Instructions

1. With the vehicle on level ground, slightly loosen the lug nuts on both front wheels.
2. Raise the front of the car and support with jack stands.
3. One at a time, remove the front wheels and remove the existing center caps (if present). Replace with new Wheel Spinner Center Caps (A) See Figure 2.
4. Reinstall front wheels onto the car and snug down lug nuts in a criss-crossing pattern.
5. Lower the front of the car and completely tighten lug nuts in a criss-crossing pattern, to your cart manufacturer's recommended torque.
6. Repeat steps 1-6 on the rear of the car
7. Insert the Shoulder Bolt (B) through the front (non weighted) side of the Wheel Spinner (D) and then slide the Nylon Washer (C) over the back of the Shoulder Bolt.
8. Being careful not to unseat the Nylon Washer, begin threading the Shoulder Bolt into the Center Cap. Tighten the spinner assembly securely to the center cap with a 3/16 Allen wrench and ensure free rotation of the Spinner. See Figure 3. (If Spinner does not rotate freely repeat this step to ensure the assembly is installed properly)
9. Repeat steps 8 & 9 on the remaining wheels to complete the installation

**NOTE:**
These spinners are designed to work on golf cars traveling at a wide variety of speeds. If you do not notice the Spinners 'spinning' while initially accelerating in a straight line do not worry. The gyroscopic forces acting on the product will naturally cause the desired 'spinning' motion during the course of normal golf car operation.
